Dear Sir/Madam

We are pleased to inform you about the result of the suitable contact time of your chemical disinfectant with your recommended commercial concentration product namely "ULTRAXIDE" can against to highly pathogenic avian influenza virus subtype H5N1, 1×10^6 EID₅₀/ml. According to methods including embryonated chicken eggs inoculation, hemagglutination assay and hemagglutination-inhibition test, were based on of Office International des Epizootics (OIE), we found that ULTRAXIDE with diluted concentration of 1:200 can completely inactivate HPAI H5N1 at 1, 5, 10, 15 and 30 minute of contact time.

Best Regards,

(Prof. Dr.Thaweesak Songserm) D.V.M., Ph.D.
Head, Avian Influenza Division, Faculty of Veterinary Medicine
